

Collaborative Working Project executive summary

Project title	Sanofi & University Hospital Southampton Chronic Graft versus Host Disease Pathway Mapping Project (cGvHD)
Partner organisation/s	University Hospital Southampton NHS Foundation Trust Tremona Road, Southampton SO16 6YD Sanofi 410 Thames Valley Drive, Reading, Berks, RG6 1PT
Project rationale	A collaborative working agreement between Sanofi and University Hospital Southampton NHSFT to map and review the Chronic Graft Vs Host Disease (cGvHD) pathway, with an extended focus on the gynaecological cGvHD part of the pathway. The mapping will inform a service evaluation report that the Bone Marrow and Transplant team can use to inform any changes to improve the service.
Project period	Q3 2025 3 month project
Project objectives	The aim of the project is: • To map and review the cGvHD pathway to optimise service capacity and efficiency, improve patient care, deliver a positive patient experience and patient outcomes when undergoing post-transplant treatment within the UHS service. The project will aim to deliver the following objectives: • Map and evaluate the cGvHD pathway post-transplant, to identify any service gaps and variation in patient care • Identify potential areas for improvement • Map capacity and demand of cGvHD clinic and appropriate elements of the service • Produce an action plan with support from steering group based on pathway mapping exercise to inform decisions around potential improvements to the service

	Produce a case study of the outputs and outcomes of the project to share learning with other NHS organisations. The total indirect cost of this collaborative working project is approximately £6336. Proportions: Sanofi 43% NHS 57%
